DIRECTIONS FOR USE

1. Remove staple holding locking bar to wood base. The scented pedal means no bait is required. (Bait can be placed at point A if needed – peanut butter or chocolate are recommended).
2. Pull back bow. Hold down with thumb.
3. Lift pedal slightly, slotting locking bar into pedal box at point B.
4. Gently release pressure on bow to engage locking bar.
5. Place trap against wall, ensuring that the pedal is flush to the wall.
6. Double-bag the rodent bodies and place them in a bin with a secure lid.
